INVESTOR PRESENTATION

Safe Harbor

This presentation contains "forward-looking statements" as defined under U.S. federal securities laws. Forward -looking statements are generally identified by the use of the words "will," "may," "believes," "expects," "forecast," "intends," "anticipates," "projects," "outlook," "target," "plans" and "seeks," and, in each case their negative, and other variations or comparable terminology.

Forward-looking statements are based on management' s current expectations and involve risks and uncertainties that could cause actual results, performance or achievements to differ significantly from IBP's historical results or those implied in such forward-looking statements, including, without limitation, general economic and industry conditions, rising home prices, inflation and interest rates; the supply chain and material constraints; increased tariffs; federal government shutdowns and uncertainty regarding the federal government's policy changes; geopolitical conflicts; the timing of increases in our selling prices; and the risk discussed in the "Risk Factors" section of our Annual Report on Form 10-K for the year ended December 31, 2025, as the same may be updated from time-to-time in our subsequent filings with the SEC. You should not place undue reliance on forward-looking statement as a prediction of actual results. Any forward-looking statements in this presentation speak only as of the date hereof. IBP expressly disclaims any obligation or undertaking to release publicly any updates or revisions to any forward-looking statements to result any change in expectations or events, conditions or circumstances on which any such statements are based.

Non-GAAP Financial Measures

This presentation includes the following non-GAAP financial measures: (1) EBITDA, Adjusted EBITDA and Adjusted EBITDA Margin, (2) Adjusted Net Income and Adjusted Net Profit Margins (3) Adjusted Net Income per diluted share, (4) Adjusted Selling Administrative (S&A), (5) Adjusted Cost of Sales, (6) Adjusted Gross Profit, (7) Free Cash Flow, and (8) Net Debt . For the periods ended June 30, September 30, and December 31, 2024 we reported Adjusted Net Income (Loss), Diluted Adjusted Net Income (Loss) per Share, dispositions and net of dispositions in order to provide useful insight and metrics relevant to understanding and evaluating the results of our ongoing operations given plans to close a single new commercial end market-oriented branch. As of the three months ended June 30, 2025, the closing of this branch is essentially complete and its financial results were insignificant. Therefore, we have chosen not to report any financial results for dispositions or net of dispositions in the tables below. These non-GAAP financial measures should be considered only as supplemental to, and not as superior to, financial measures prepared in accordance with GAAP. Please refer to the Appendix of this presentation of a reconciliation of the non-GAAP financial measures included in this presentation to the most directly comparable financial measures prepared in accordance with GAAP.

EBITDA, Adjusted EBITDA, Adjusted EBITDA margin, Adjusted Net Income, Adjusted Gross Profit, Adjusted Selling and Administrative Expense, and Free Cash Flow measure performance by adjusting EBITDA, GAAP net income, gross profit and selling and administrative expense, and GAAP net income, respectively, for certain income or expense items that are not considered part of our core operations. We believe that the presentation of these measures provides useful information to investors regarding our results of operations because it assists both investors and us in analyzing and benchmarking the performance and value of our business.

We believe the Adjusted EBITDA measure is useful to investors and us as a measure of comparative operating performance from period to period as it measures our changes in pricing decisions, cost controls and other factors that impact operating performance, and removes the effect of our capital structure (primarily interest expense), asset base (primarily depreciation and amortization), items outside our control (primarily income taxes) and the volatility related to the timing and extent of other activities such as asset impairments and non-core income and expenses. Accordingly, we believe that this measure is useful for comparing general operating performance from period to period. In addition, we use various EBITDA-based measures in determining the achievement of awards under certain of our incentive compensation programs. Other companies may define Adjusted EBITDA differently and, as a result, our measure may not be directly comparable to measures of other companies. In addition, Adjusted EBITDA may be defined differently for purposes of covenants contained in our revolving credit facility or any future facility.

Although we use the Adjusted EBITDA measure to assess the performance of our business, the use of the measure is limited because it does not include certain material expenses, such as interest and taxes, necessary to operate our business. Adjusted EBITDA should be considered in addition to, and not as a substitute for, GAAP net income as a measure of performance. Our presentation of this measure should not be construed as an indication that our future results will be unaffected by unusual or non-recurring items. This measure has limitations as an analytical tool, and you should not consider it in isolation or as a substitute for analysis of our results as reported under GAAP. Because of these limitations, this measure is not intended as an alternative to net income as an indicator of our operating performance, as an alternative to any other measure of performance in conformity with GAAP or as an alternative to cash flow provided by operating activities as a measure of liquidity. You should therefore not place undue reliance on this measure or ratios calculated using this measure.

We also believe the Adjusted Net Income measure is useful to investors and us as a measure of comparative operating performance from period to period as it measures our changes in pricing decisions, cost controls and other factors that impact operating performance, and removes the effect of certain non-core items such as discontinued operations, acquisition related expenses, amortization expense, the tax impact of these certain non-core items, and the volatility related to the timing and extent of other activities such as asset impairments and non-core income and expenses. To make the financial presentation more consistent with other public building products companies, beginning in the fourth quarter 2016 we included an addback for non-cash amortization expense related to acquisitions. Accordingly, we believe that this measure is useful for comparing general operating performance from period to period. Other companies may define Adjusted Net Income differently and, as a result, our measure may not be directly comparable to measures of other companies. In addition, Adjusted Net Income may be defined differently for purposes of covenants contained in our revolving credit facility or any future facility.
